01 PROJECT BRIEF

What are we working on ?

OUR CLIENT

University of
BRISTOL

PROLINE

A company that offers **professional, reliable,** and **affordable luxury taxi & chauffeur** services.

COLLABORATION

Proline has been offering **taxi services** to the University of Bristol **staff** since **2019**.

PROBLEM

The **current booking process** with the University of Bristol is **inefficient, time-consuming,** and **heavily manual**.

SOLUTION

Streamlining the manual process with a **digital experience,** promoting clear **communication** and **automation**.

PASSENGER

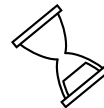

I want the booking approval process to be faster and transparent to **save time**.

FINANCE STAFF

I want to view the key details of a booking instantly and approve or reject it **quickly**.

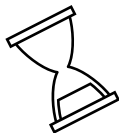

USER STORIES

PROLINE

We want to automate the current laborious back-and-forth booking process to **save time**.

have look around !

Let's see what it looks like!

03

PROJECT ARCHITECTURE

What tools did we use ?

React

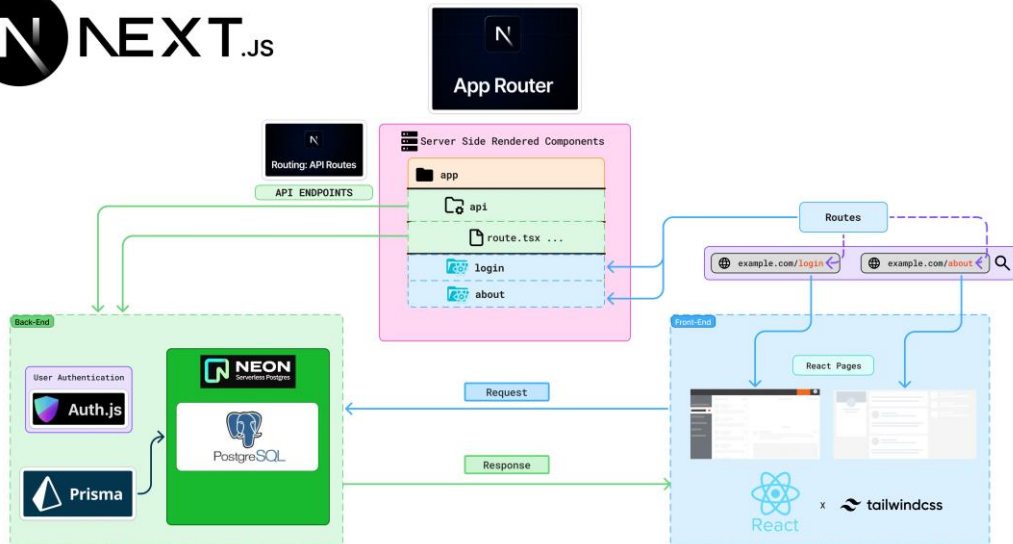

BACKBONE.JS

Semantic U

ANGULARJS

N NEXT.JS

- File based routing system.
- Server-Side Rendering (SSR).
- API Endpoint routes (Backend).

POSTGRESQL X NEON

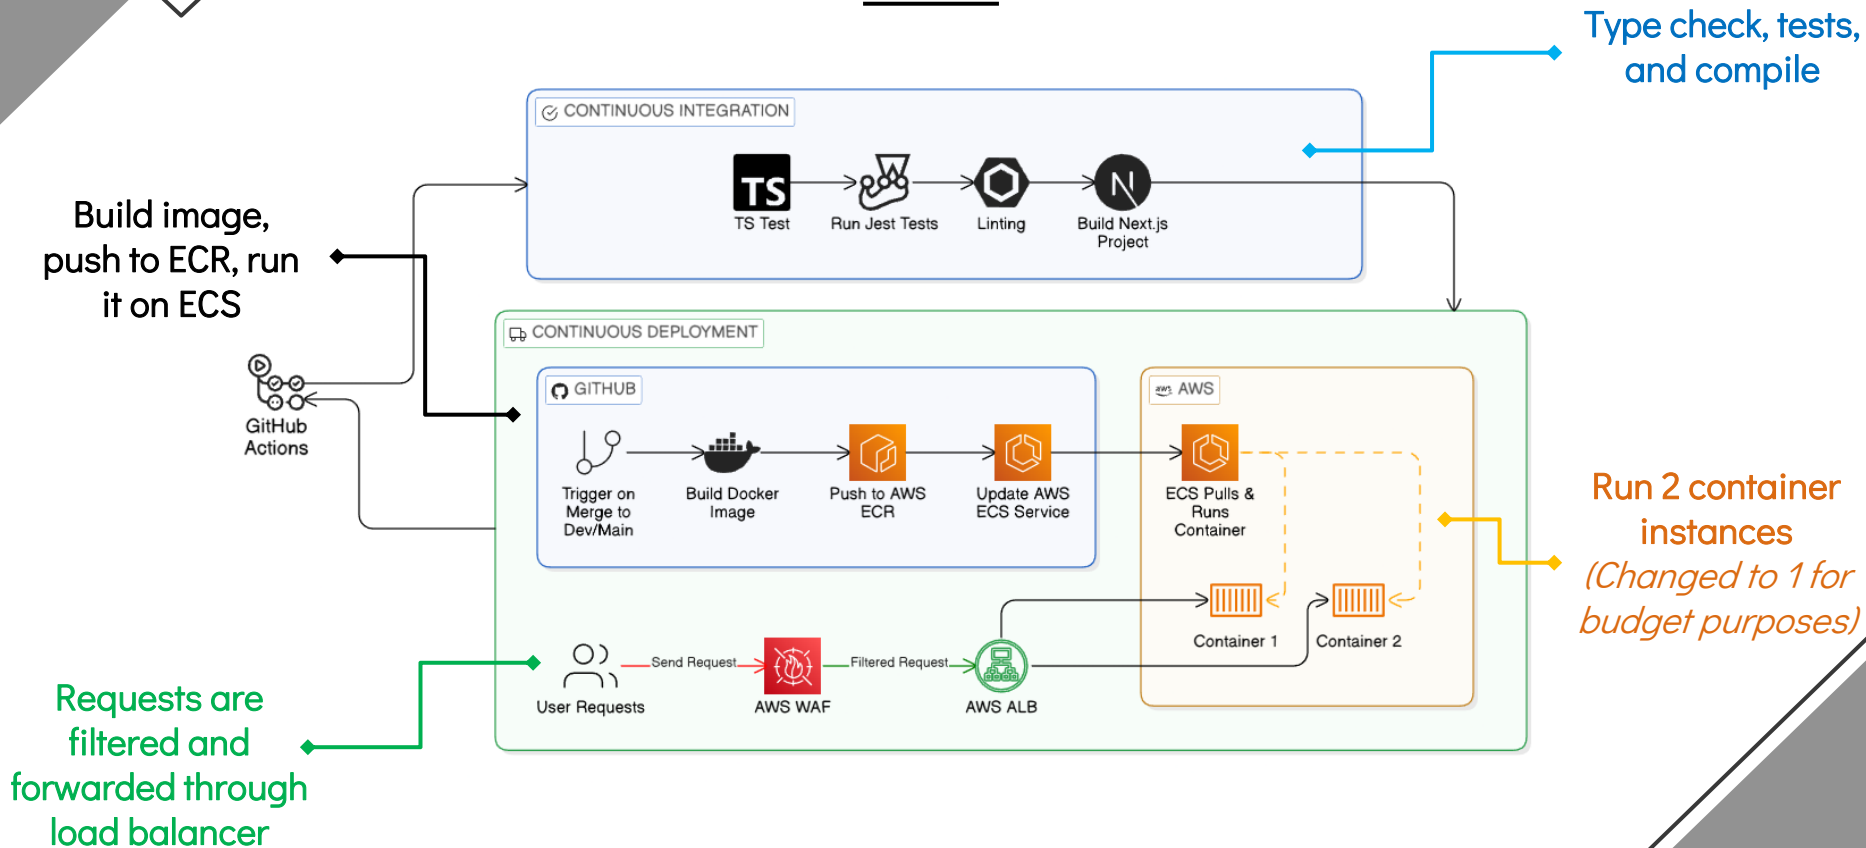

- Better concurrency
- Convenient GUI (Neon Console).
- Git-like branches for DB version control.

PRISMA

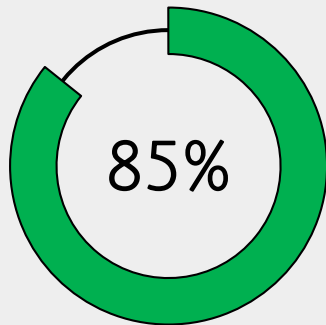

- JS-like query syntax.
- GraphQL adjacent data fetching.
- Layer of abstraction.

CLOUD ARCHITECTURE (CI/CD)

TEST COVERAGE

FRONT-END
COVERAGE

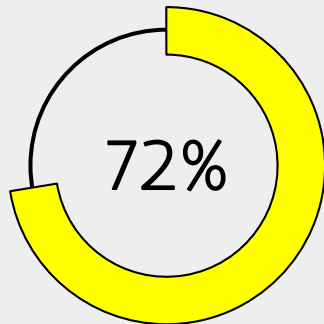

File	% Stmts	% Lines
All files	85.08	85.08

*Testing of conditional rendering still
needs more coverage*

The result is generated by Jest's built-in
coverage analyzer

TEST COVERAGE

BACK-END
COVERAGE

File	% Stmts	% Branch	% Funcs	% Lines
All files	89.83	72.22	97.05	89.83

Branch logic coverage was chosen as the primary metric, as it best reflects backend behavior.

The result is generated by Jest's built-in coverage analyzer

SUGGESTIONS

MISLEADING

A lot of element have **unnecessary hover effects**, feel like **buttons**.

CONVENIENCE

Hitting **enter** should **update the map**, interactive **card filtering**.

SECURITY

Profile **editing** should **prompt a password** entry.

UI/UX

Sticky navbar and **refreshing errors** after wrong input.

SUGGESTIONS IMPLEMENTED

MISLEADING

A lot of element have unnecessary hover effects, feel like buttons.

CONVENIENCE

Hitting enter should update the map, interactive card filtering.

SECURITY

Profile editing should prompt a password entry.

UI/UX

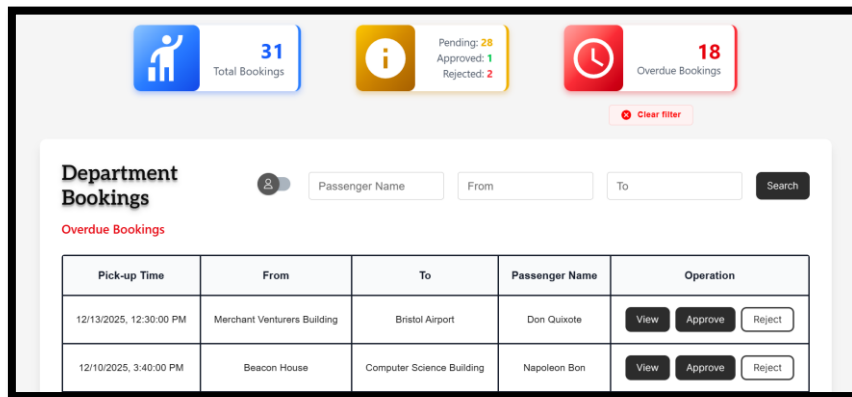

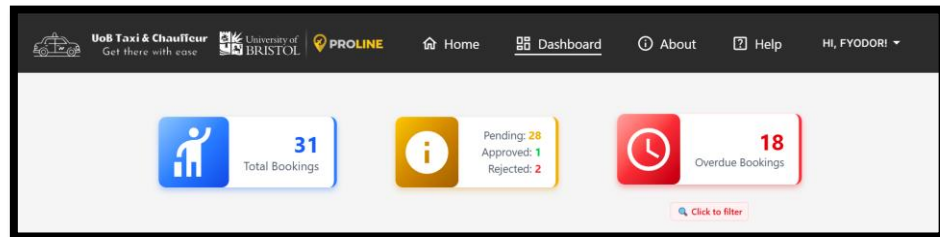

Sticky navbar and refreshing errors after wrong input.

SUGGESTIONS

CONVENIENCE

Hitting enter should update the map, interactive card filtering. ✓

SUGGESTIONS

SECURITY

Profile **editing** should
prompt a password entry.

The screenshot shows a user profile editing interface. The background is a dark gray panel with a white border. It contains several sections: 'FULL NAME' with the value 'Fyodor Tolstoi', 'Contact Information' with 'EMAIL' 'fyodor@gm' and 'Phone Number' (with a red outline), and 'Account Det' with 'DEPARTMENT' 'Economics'. At the bottom are 'Save Changes' and 'Cancel' buttons. A white modal dialog is centered over the form, titled 'Enter Password to Save Changes'. It contains a 'Password' input field with a toggle icon, and 'Cancel' and 'Save' buttons at the bottom.

CHALLENGES & SOLUTIONS

01

Unstructured team meetings resulting in drawn out, ineffective meeting

vs

Appoint a rotating stand-up leader, using pre-defined agenda

01

02

Lack of discussion in Pull Requests, unread descriptions

vs

Shift discussions from Teams to GitHub comments, highlighting key points in PR descriptions.

02

03

Integrating a new member into the project, getting them up to speed

vs

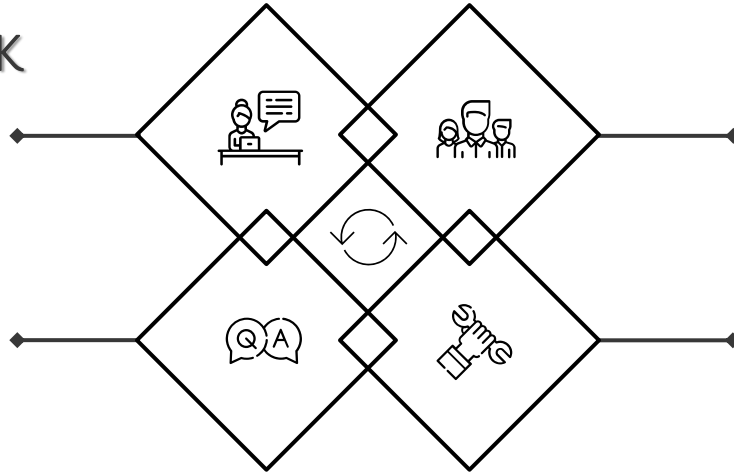

Utilizing the project manual document, pair programming

03

OUR PROCESS

MENTOR FEEDBACK

Identify weak points, areas of improvement to iterate on

TEAM MEETING

Follow agenda, track progress, assign tasks,

PUBLISH WORK

Create a PR for review, have discussion on certain features, Merge

WORK ON ISSUE

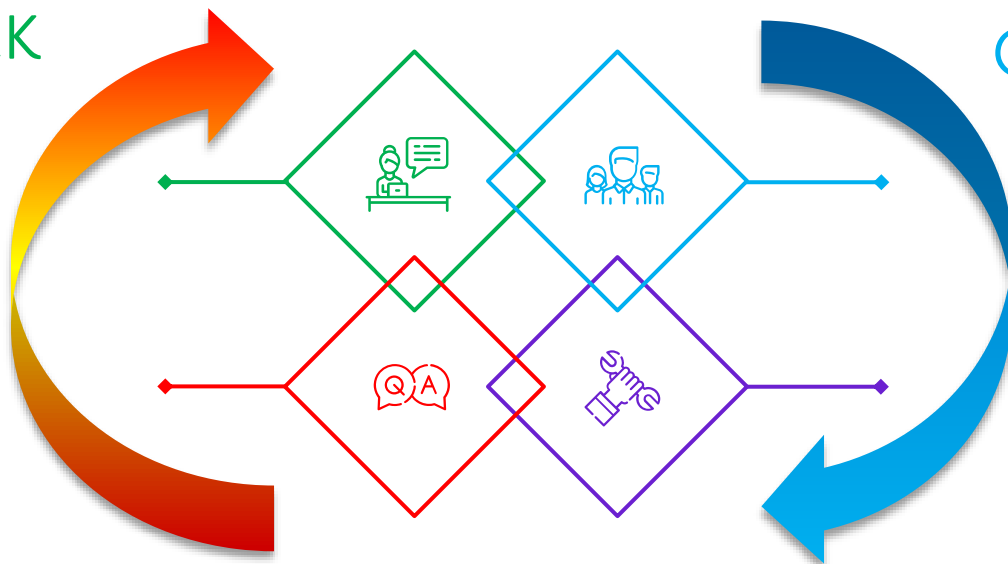

Work on the task, develop, ask help if needed

AGILE DEVELOPMENT

FEEDBACK

COLLABORATE

ITERATE

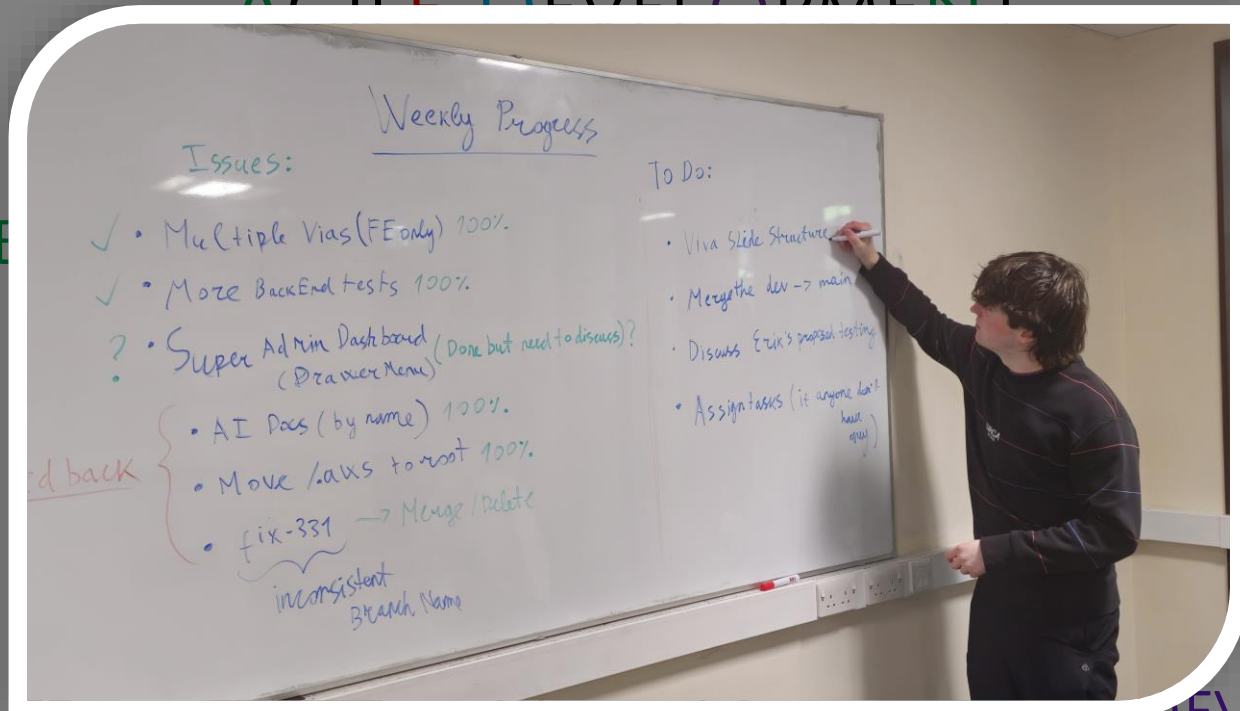

DEVELOP

AGILE DEVELOPMENT

FEEDBACK

COLLABORATE

ITERATE

DEVELOP

OUR WONDERFUL STAND-UP LEADER ERIK LEADING THE MEETING

Deployment is useful for **checking** in on **progress**

Info cards are useful for getting quick **summary statistics**

The **map** is visually **fitting** and **intuitive** to use for bookers

CLIENT FEEDBACK

Up to **5 vias** should be allowed with **routing** functionality

Allow for **custom department** inputs in booking and registration process

Price attaching and **exporting** bookings as **CSV** feature

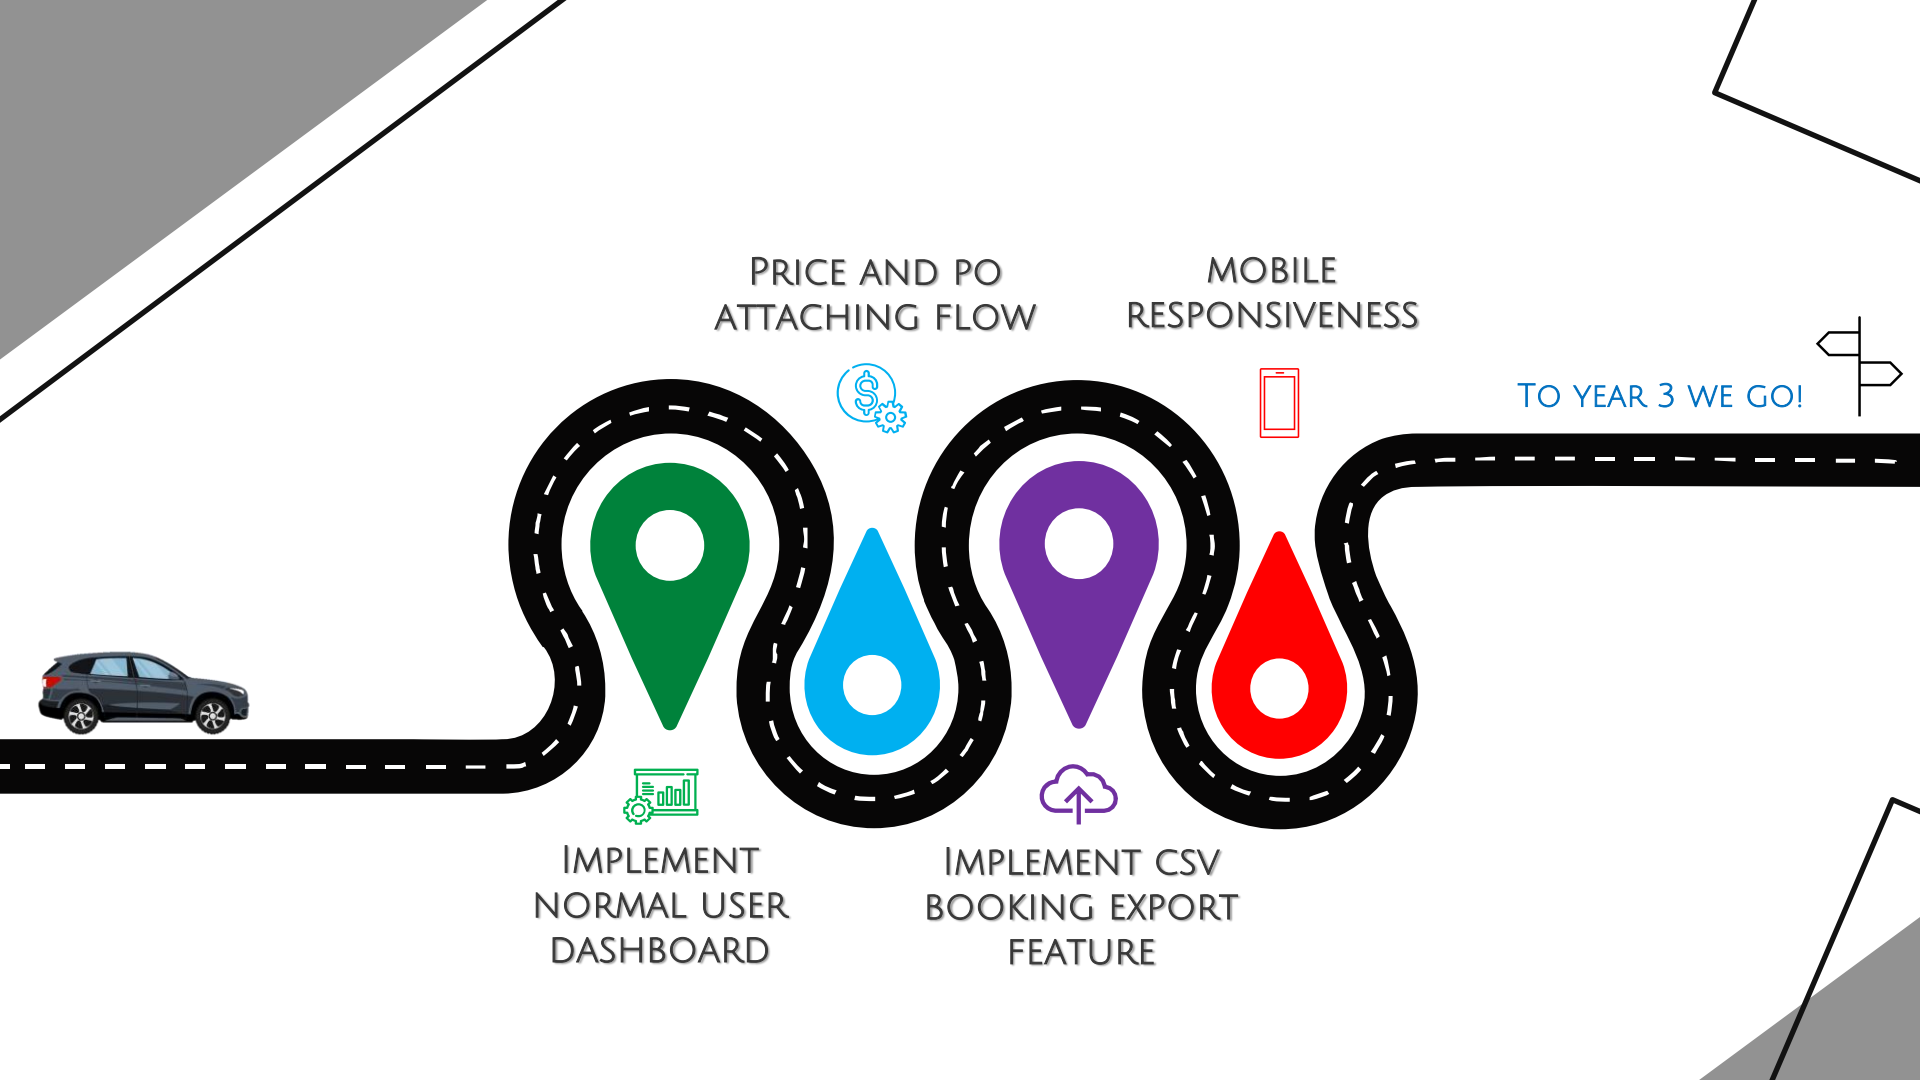

05

WHAT NEXT ?

Looking forward.....

THANK
YOU !
